

## **Standard Box Corer Sampling Size 0.25 m<sup>2</sup>**

### **1 Box corer, box 500 x 500 mm, sampling size 0.25 m<sup>2</sup>**

including safety wire preventing loss of corer in case of cable fracture within the corer.

The complete box corer exists of the following main parts:

1. the frame
2. the column with the top
3. the head and frame for the box
4. the box, and
5. the crank with the spade
6. 1 wooden palette for transporting the box

The box 500 x 500 mm made of stainless steel 1.4571

The steel spade, hot galvanised, including rubber sealed plate

If required, the standard box corer can be supplied with mountings made of rust-resistant 1.4571 steel for a video camera and a light source. Please ask for a supplementary offer on which you have decided which equipment you are interested in.

## **Standard Box Corer Sampling Size 0,1 m<sup>2</sup>**

### **1 Box corer, box 320 x 320 mm, sampling size 0.1 m<sup>2</sup>**

including safety wire preventing loss of corer in case of cable fracture within the corer.

The complete box corer exists of the following main parts:

1. the frame

2. the column with the top
3. the head and frame for the box
4. the box, and
5. the crank with the spade
6. 1 wooden palette for transporting the box
